NC 滚轮送料机

NC ROLL FEEDER

通过CCS（电脑控制伺服系统），高精度的实现了以往不可能的多种数值控制。可以简单地进行快速、准确的操作。

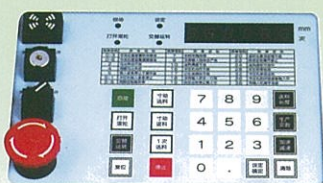

Previously unattainable high-precision numerical control is made possible by CCS (computer controlled servo), for fast and accurate performance.

※1 送料线高度是从工作台面算起的

※1 The pass line height is from top of bolster.

※2 AFK, AFC 和 AFA 的板幅 X 板厚是指在无料环坑时所具备的送料能力

※2 The indication of feeding capability is for the line without a loop pit for AFK, AFC & AFA.
